

# PRESS RELEASE

## **BERGMANN: 125 Years of Quality “Made in Goldenstedt”**

Goldenstedt, 07 December 2021

Based in the German town of Goldenstedt, Ludwig Bergmann GmbH is celebrating a special anniversary in 2021. With its management now in the third generation, the family-run business can look back on 125 years’ history. Founded in Goldenstedt in 1896 as a producer of agricultural machinery, the company has continually expanded its product range with a particular focus on professional spreader and grassland technology as well as efficient agrilogistics. With a staff of around 140 people, BERGMANN exports its machines to more than 50 countries worldwide.

### **Tradition & Innovation – Stability & Flexibility**

The company’s culture is founded on openness, fairness, flexibility and stability and fosters the responsible, sustainable use of resources. Committed to its production location in Goldenstedt, the company will continue to supply **quality “Made in Goldenstedt”** into the future: “That’s why we will continue to expand our production facilities here and further optimize our processes for an even more efficient production of our machines”, as owner and CEO Dr. Jutta Middendorf-Bergmann explains.

### **Dedicated to sustainability**

With the company’s 125-year history, the topic of sustainability is deeply rooted in its philosophy, together with the focus and development on innovative products for sustainable agriculture. “With many further solutions in the field of digital agricultural technology, such as connectivity through agrirouter, our own apps for machine performance optimization, weighing equip-

ment and weighing systems, our new ExaRate weighing compensation system and Variable Rate Control (VRC), we will continue to provide superior and sustainable support for our agricultural customers”, says Dr. Jutta Middendorf-Bergmann. “As the Corona pandemic has upset our anniversary plans, we’re all the more pleased to be able to present our new products and features to our customers at the AGRITECHNICA 2023.

**Ludwig Bergmann GmbH** is a medium sized family-run business in its third generation and has been successfully manufacturing agricultural machinery and vehicles for over 125 years. It is one of the major manufacturers and providers of customised technology for professional farming operations and farm contractors.

The combination of long-standing experience and contemporary, innovative technology is one of the company's greatest strengths. Constant focus on the needs and expectations of customers, adapting to changing technical requirements, the continuous development and improvement of products and a keen "feel" for customer requirements have made BERGMANN a reliable worldwide farming partner.

With its wide range of products, the company offers efficient and practical solutions that include **manure spreaders, universal spreaders, loader wagons, forage transport trailers, body swap systems, grain transfer trailers, beet transfer trailers and bodies for self-propelled vehicles.**
